DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 1, 2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitation "said placing step" in line 9. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-3, 5-7, 10, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenway Patent Number 2,088,238 and Searer Patent Number 5,570,554 in view of Anderson et al. Patent Number 3,616,117.

Greenway '238 and Searer '554 teaches all the limitations of the above claims except the use of adhesive and nails to secure hardwood floors to concrete. Greenway '238 teaches laying solid hardwood floors (page 2, column 2, lines 24-30) of at least about 3 feet (page 1, column 1, lines 26-29) onto a concrete surface and securing it with an adhesive (Figure 1), and said floorboards are of varying thickness at the grooves (7).

Searer '554 teaches nailing solid hardwood floor (14, 12) directly to a concrete floor surface (10, Figure 3) at a substantially ninety degrees angle (column 3, lines 3-10)

Anderson '117 teaches gluing (20) a wooden panel (16-18) and securing the wooden panel in place by nailing (22) the glued wooden panel in place through the adhesive layer until the adhesive is set.

It would have been obvious for one skilled in the art to secure solid hardwood floors directly to concrete using well known techniques of adhesive and nailing as taught by Greenway '238 and Searer '554 since it is well known in the art to secure hardwood flooring using adhesive and nailing. It would have been obvious for one skilled in the art to provide nails to a hardwood flooring that has been glued down in order to prevent the boards from moving while the adhesive sets as taught by Anderson '117 to allow the construction of the floor to continue when walked upon.

Response to Arguments

7. Applicant's arguments with respect to claim 1-3, 5-7, 10, and 12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
